

CHAFFEUR CARELESS

Caused Fatal Automobile Accident and Paid for It With His Life.

WOMAN'S BODY CUT IN TWO

Details Add Gruesomeness to Dreadful Catastrophe Near New York—The Dead and Injured.

New York, Oct. 7.—The automobile accident which occurred early today at the foot of Jerome avenue in which three persons lost their lives and six were badly injured, was one of the worst since the sport became popular in this city. Loss of life would possibly have been avoided but for the untimely arrival of a passenger train on the New York Central railroad. Unfamiliarity with the roadway was the direct cause of the accident. Albert Noyes, a chauffeur employed by the Riverside Casino, had charge of the automobile, which was a heavy touring car. With three other men and five women, the automobile had been run up to Yonkers and Van Cortland park, a popular ride for those who wish to try the speed of their machines late at night. After supping at one of the numerous hotels, the party started on their return trip about midnight. There was a straight run of several miles south in Jerome avenue, down which the machine sped at the rate of 25 to 30 miles an hour. At 160th street the avenue comes to an abrupt end. An iron fence guards the stone wall and 40 feet below are the tracks of the New York Central, skirting the edge of the Harlem river. Evidently Noyes was not thinking of his proper course, a wide sweep to the left, which would have carried the machine out upon either of two bridges across the river.

The iron fence afforded only a slight obstruction to the ponderous car and it fell with a crash to the railroad track. Unfortunately for the pleasure

seekers a local passenger train bore down upon the wrecked machine, tore it into bits and scattered the pieces along the track for two blocks. Noyes' life paid for his error. Two of the women, one of whom was identified as Anna Smith, 17 years of age, were also killed, and it is probable that some of the other six will die. Commissioner of Health Darling was a passenger on the train. He took charge of the relief work, summoned ambulances and hurried the injured to Fordham hospital. They were so completely dazed by the sudden ending of their trip as to be unable to furnish any details or give the name of the third victim—a woman whose body had been cut in two. The casualties were:

The Dead.
ALBERT NOYES.
ANNA SMITH.
UNIDENTIFIED WOMAN.
The Injured.
EMMA PEREZ.
BELLE PEREZ.
JEANETTE DAVIS.
CHARLES DORAN.
THOMAS MURPHY.
MOSES SPIES.

WHAT TO EAT TOMORROW

MENU-SUNDAY

So far as man thinks, he is free—Emerson.

BREAKFAST.
Raspberries.
Cracked Wheat.
Meat Balls. Fried Potatoes.
Butter Cakes. Coffee.

DINNER.
Oysters on Half Shell.
Cream of Potato Soup.
Chicken Pie.
Green Peas. Squash.
Peach Ice Cream.
Coffee.

SUPPER.
Chipped Beef.
Potato Salad. Apple Tarts.
Rolls. Iced Tea.

PEACH ICE CREAM.—A dozen ripe peaches are peeled and cut into small pieces, then mashed thoroughly with a wooden spoon; three quarts of milk and a pint of cream, with the peaches, will make a gallon of ice cream. The milk should be sweetened well before adding the peaches. When thoroughly mixed strain through a colander and add the cream. Remember that freezing lessens the sweetness, so enough sugar should be used to counteract this.

PLAN GREAT RESERVOIR

Object to Increase Greatly the Yield of Croton Water Shed.

WOULD BURY A TOWN

Homes & Century Old May Be Condemned in Order to Carry Out Project—4,000 Acres Will Be Submerged.

New York, Oct. 7.—Preliminary surveys by engineers in the employ of the city are being made and reports have been submitted to the aqueduct commissioners to increase the yield of the Croton water shed by building therein another enormous reservoir nearly seven miles long and which, it is estimated, would store more than ten thousand million gallons for use in Manhattan. It is estimated that, should the plans be approved and developed with a smaller supplementary reservoir at Cross river they would furnish an additional 50,000,000 gallons daily to the present supply of Croton water.

Twenty-five feet would be the greatest depth of water stored in the reservoir. At Paulding the water would be from 10 to 15 feet deep and over the present site of the thrifty little town of Paterson, which rests in a hollow with 1000 inhabitants, three hotels, churches and a cigar factory, the Croton water would pile up to a depth of from 17 to 20 feet. The operation would flood 4000 acres, or six and a quarter square miles, about one-third of which, roughly speaking, is improved property. Everything in the town of Paterson would have to be taken by condemnation proceedings with the farm lands and many fine homesteads to the south of Paterson, not a few of which date back a century and a quarter.

Grand Free Offer to Readers of

THE MORNING ASTORIAN

Having contracted at considerable expense with the publishers of this high grade magazine we beg to offer :: :: :: ::

One Year's Subscription Free of Cost

to all and any readers of our paper who sign and send in the coupon below at once

MADAME

Brings a monthly message of culture to your home and contains all that is best in literature and art. It is endorsed by OVER THREE MILLION OF THE MOST CULTURED WOMEN IN AMERICA, being adopted by the National Council of Women of America as their official organ.

Madame has a circulation of over 200,000 each month

A MODERN MAGAZINE. Finely illustrated by the worlds best artists and containing articles on the leading topics of the day by leading thinkers and writers, besides all the various departments of a modern magazine well represented. :: ::

Let us send you a free sample copy so that you can see exactly what a beautiful Magazine this is, or sign and return the coupon and we will mail you the Magazine free for one year.

Newbro's Herpicide

THE ORIGINAL REMEDY THAT "KILLS THE DANDRUFF GERM."

SCHOOL CHILDREN.

Every school child should know that baldness is a contagious disease, caused by a microbe. Prof. Unna, of Hamburg, Germany, discovered that dandruff, itching scalp, falling hair, and final baldness are produced by a germ or microbe that passes from one head to another, where it burrows into the scalp and by multiplying and extending deeper and deeper into the hair follicles, saps the life of the hair root and produces baldness.

IT TAKES YEARS

to produce complete baldness, for the action of the dandruff microbe is not constant in every case. It is governed by predisposition, by the state of health, by environment, but particularly by the endeavor made to combat the growth and development of the dandruff microbes, which can only be destroyed with Newbro's Herpicide.

This new antiseptic scalp germicide is past the experimental stage. It was made to destroy the germ that causes dandruff and falling hair, and by

coaxing energy back into the impoverished bulbs, it enables the hair to grow naturally and luxuriantly. Thousands of letters from physicians, clergymen and laymen tell the same story of its wonderful success.

AN IDEAL HAIR DRESSING.

It is fortunate for those who understand the new rules for scalp cleanliness that the antiseptic qualities of Newbro's Herpicide make it the most delightful and refreshing hair dressing imaginable. Chronic baldness is incurable; save your hair, while you have hair to save.

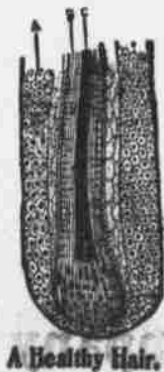

"ENTHUSIASTIC HERPICIDE FOLLOWERS."

"I am pleased with your Herpicide and consider it all that one could ask as a dressing and all that you claim for it. I tell all my friends there is nothing like Herpicide."

Seattle, Wash. (Signed) MRS. S. B. MARRICK.

"I have given Newbro's Herpicide a fair trial and permit me to say that it is within itself a wonder. As a remedy for dandruff and falling hair I think it is far superior to anything in its line."

Onkendale, Wash. (Signed) R. E. MITCHELL.
